INDEX TO VOLUME VIII.—FEB. 1904—JAN. 1905.

FEBRUARY, 1904.

A Modern German High-Power Gas Engine M'f'g Plant. 3
Saturated and Superheated Steam.. 6
Progress in Wireless Telegraphy... 7
A Curious Break in the Valve Chest of a Slide-Valve Engine..... 8
A New Use for Aluminum..... 8
The Regulation of Steam Engines. Part 1 9
The Advantages of Alternating Current in Transmitting Power..... 12
Editorials:
Increased Use of Water and Air Currents for Generating Power.. 14
An Army of Central Station Engineers 14
The Value of Training..... 15
The Compressed Air Power Plant at the St. Louis Exposition..... 16
A Large Chimney..... 18
Some Engineering Experiences..... 18
Fireless Steam Engine..... 19
Letters from Engineers:
Sight Feed Lubricator..... 20
Blowing Down Boilers..... 23
Spooling a Pin..... 23
Questions and Answers..... 24
An Improved Boiler Cleaner..... 26

MARCH, 1904.

The Great Baltimore Fire..... 3
Storage Batteries 5
Changes and Improvements. W. H. Wakeman 6
A Modern Steam Generating Plant in Scotland. F. C. Perkins..... 7
The Economizer. J. J. McGuire.... 10
The Regulation of Steam Engines. Part 2 11
Liquid Fuel 12
Some Engineering Experiences..... 13
Heating of Crank Pins..... 13
Editorials:
Zinc, Scale and Corrosion..... 14
The Power in a Pound of Coal.... 14
A Water Tube Boiler Explosion... 15
Peculiar Explosion of Water-Tube Boilers. John C. Higdon, M. E.. 16
Letters from Engineers:
Steam Pump Economy..... 19
More About the Steam Loop..... 21
Sight Feed Lubricators..... 21
Questions and Answers..... 22
Injectors 23
The "Economic" Condensing Exhaust Head 24
The Lunkenheimer Metal-Melting Furnace 24
Two-Cylinder Steam and Air Motor. 25
Allentown 26-27
Book Reviews 28

APRIL, 1904.

An Immense Power House Damaged by Ice 3
Operating Condensers. By Albert R. Emmonds 6
The Regulation of Steam Engines. Part 3 7
Laminations in Boiler Plates..... 9
A Suburban Trolley Power House.. 10
Babbitting Journals 11
Changes and Improvements. By W. H. Wakeman 12
Results of Tests Made on Gas Engine Pumps 13
A Large Mine Hoisting Engine..... 13
Editorials:
Water Tube Boilers..... 14
Liquid Fuel for Power Purposes.. 14
The Steam Turbine..... 15
Some Types of Triple Expansion Engines 16
Noon Hour at Powers' Mill. Part 8. By A. Edward Rhodes..... 17
Economy. By C. W. Dunlap..... 18
High Pressure Gas Distribution at St. Louis 19
Letters from Engineers:
Horse Power of Simple Engines... 20
The Way Some Things Are Done. 21
Poor Cylinder Oil? Remedy..... 23
Questions and Answers.....24-25
Boiler Appliances 26
The Branch Steam Trap..... 26
Steam Receivers and Separators.... 27
Force Feed Lubricators..... 27
Growing Uses and Importance of Asbestos 27
Book Review 28
Bathed in Lubricating Oil..... 28
Storage Battery Rooms..... 28

MAY, 1904.

A Motor-Driven Manufacturing Plant 3
Chimneys for Boiler Plants. R. T. Strohm 7
Engineering in Japan..... 9
The Regulation of Steam Engines. Part 4 10
The Horizontal and Vertical Steam Turbine 12
Horse-Power of Belting 13
Editorials:
The Mud Drum and the Dome.... 14
The Relative Effect of Losses..... 14
The Economical Use of Exhaust Steam 15
Shop Tests of "Alternator Efficiency." J. W. Himmelsbach..... 16
The Gas Engine for Central Station Service 17
Hints on Packing Water Gauge Glasses 19
Temperature of the Fire..... 19
Letters from Engineers:
The Economical Use of Steam..... 20
The Way Some Things Are Done. 21
The Steam Loop..... 22
Questions and Answers..... 24
An Interesting Dynamo Repair..... 26
The Cunningham Auto-Positive, Self-Closing Water Gauge..... 27
Pressed Steel for Shaft Hangers.... 27
Book Reviews 28
Allentown Convention of the A. O. S. E. 29

JUNE, 1904.

Heating Surface Efficiency. R. T. Strohm 3
Modern Swiss and Italian Hydraulic Turbine Plants. F. C. Perkins.... 7
Pulverized Coal 9
The Regulation of Steam Engines. Part 5 10
Peculiarities of Water 12
Large Pumps for Dredging Purposes 13
Deterioration of Grates 13
Editorials:
Boiler Furnace Efficiency..... 14
Alternating Current Frequency.... 14
Sixty Years of Electricity..... 15
Notes on Burning Bituminous Coal. 16
Letters from Engineers:
A Handy Ratchet..... 20
The Engineers We've Had. No. 1 20
A Home-Made Grease Cup..... 21
Questions and Answers..... 22
A New Horizontal Water Tube Boiler 23
The Locke Damper Regulator..... 24
The Dunham Low Pressure Trap... 24
Crane Patent Encased Spring Pop Safety Valve 24
The Allentown Convention of the A. O. S. E..... 26

JULY, 1904.

An Austria-Hungary Power Transmission Development. F. C. Perkins 3
The Steam Turbine. C. M. Jones... 5
Steam and Oil Separators. Part 1.. 7
Gas Power Applied to the Textile Industry 10
Electricity for Thawing Water Pipes 10
Instruction for the Care of a Dynamo 11
Location of Feed Pipes in Steam Boilers. W. F. Burdick..... 11
Recent German High-Power Electric Mining Hoists 12
Editorials:
The Heating Value of Coal..... 14
The Use of Steel for Steam Pipes. 15
Two Engineers Necessary..... 15
The Use of Superheated Steam and of Reheaters in Compound Engines of Large Size. Lionel S. Marks 16
Some Engineering Facts About the Panama Canal 19
Proposed Standard for Cast-Iron Collars for Shafts. Jerry Leahy, Jr. 19
Letters from Engineers:
Opening and Closing Valves..... 20
Massachusetts License Law..... 21
As Things are Often Done..... 23
Questions and Answers..... 24
A Motor-Driven Pump Without Gears 27
An Oil Filter 28
Castings for the Largest Steel Stacks in the World for the Pennsylvania Railroad Tunnel Power House..... 28
An Emergency Steam Trap..... 29
Steam Turbine Tests..... 30
A World's Record in Coal Hoisting. 30
Noon Hour at Powers' Mill. Part IX. A. Ed. Rhodes..... 31
Properties of Graphite..... 31

AUGUST, 1904.

Blow-Off Valves and Pipes. W. H. Wakeman 3
Some Facts About Fuels..... 5
Indicator Diagrams and the Horse-Power Formula 7
Petroleum Briquettes for Fuel..... 9
Steam and Oil Separators. Part 2.. 9
How to Calculate Speed..... 11
The Effect of Lightning on a Brick Chimney 12
Heater Troubles. Too Hasty in Condemnation. C. W. Dunlap..... 13
Cements Used for Concealing Blow-Holes 13
Wireless Telegraphy in Canada..... 13
Editorials:
Side Talks with the Editor..... 14
The Horse-Power Formula..... 14
What Would You Do?..... 15
The Value of Good Inspection..... 15
An Immense Water Wheel at a Tin-Plate Works in South Wales. Frank C. Perkins..... 16
Advertising and Export Business... 16
The Choice of a Steam Plant. With Special Reference to American Electric Power Installation..... 17
Rule for Ascertaining the Safe Working Pressure of a Cylindrical Boiler 19
Wood as Fuel..... 19
Letters from Engineers:
Opening and Closing Valves..... 20
Crude Oil as Fuel..... 23
Locomotive Boilers 24
Questions and Answers..... 24
Calculations Simplified. Part 1. Prof. A. Ed. Rhodes..... 26
A Corliss Valve Steam Trap..... 28
The Lunkenheimer Exhibit at St. Louis 28
Sterling Dust Collectors..... 28
Engine Bridge Wall Repair..... 29
Scalded by Escaping Steam. Effect of Water Hammer..... 30
Economy of the Horizontal Tubular Boiler vs. the Water Tube Boiler. 31

SEPTEMBER, 1904.

The Mechanical Plant of the "Ladies' Home Journal" and "Saturday Evening Post"..... 3
The Value of Oil in Transformers.. 5
Methods for Measuring the Clearance of a Steam Engine..... 6
Indicator Motions 6
Steam Turbines. Part 1. R. T. Strohm 10
Turbine and Reciprocating Engines Used Together on Torpedo Boats. 12
Comparative Cost of Water Power... 12
Bronzing Cast Iron..... 12
Street Railway for China..... 12
The First Locomotive that Ever Ran on a Railroad in the United States. Seventy-fifth Anniversary of the Event 13
Ice-Making in India..... 13
Hard-Soldering Fluid..... 13
Editorials:
In Memory of Rober Fulton..... 14
Our Big Coal Output..... 14
What is Electricity?..... 15
The Indicator as a Recorder..... 15
Central Station of the City of Jacksonville, Florida 16
Cross-Exhaust Valves, Cushion Valves and Their Use. C. W. Dunlap 17
Starting and Stopping Boiler Tests. W. H. Wakeman 18
A Twice-Told Tale..... 19
To Give a Black Color to Brass or Bronze Articles 19
Horse-Power of Waterfalls..... 19
Letters from Engineers:
As Things are Often Done..... 20
Opening and Closing Valves..... 21
Extracting Boiler Tubes..... 23
Questions and Answers..... 23
Wernicke Boiler Tube Cutter..... 27
Albany Grease and Grease Cups.... 27
The Vigilant Feed-Water Regulator 28
A Universal Belt and Pulley Regulator 28
The N. A. S. E. Convention..... 29
Bath for Nickelling Britannia Metal 29

OCTOBER, 1904.

The Electrical Production of Peat Coal in Norway. F. C. Perkins... 3
Commutator Troubles and Their Remedy 4
The Most Powerful Locomotive in the World 5
Wireless Telegraphy in the War.... 5
The Electro-Magnet 6
Steam Turbines. Part 2. R. T. Strohm 8
A Modern Small Power House for Factory Uses. J. W. Himmelsbach 11
The Miner's Inch for Measuring Water 12
Hardening and Tempering Steel for Permanent Magnets 12
Welding Instead of Riveting..... 12
Remedy for Burns and Scalds..... 13
Refrigerating Machines 13
Water 13
Editorials:
The Use of Peat for Fuel..... 14
Water Power Plants..... 14
Superheaters 15
Small Refrigerating Plant for a Candy Factory 16
Lignite in Nebraska and Dakota..... 17
Plant at York Haven, Pa., Put in Operation Successfully 17
Letters from Engineers:
How Should Valves be Connected on Steam Boilers?..... 19
Emergency Repairs to Flange in Steam Line 19
Running of Belts..... 20
Questions and Answers..... 21
The Patterson-Berryman Feed-Water Heater 27
An Interesting Exhibit..... 27
The Mosher Water Tube Boiler..... 28
Valve Troubles 29

NOVEMBER, 1904.

Explosion of a Tubular Boiler..... 3
The Electric Storage Battery..... 6
Something About Plug Cocks. W. H. Wakeman 10
Some Things About Horse-Power and Compression. Wm. Kavanagh 12
Length of Connecting Rod..... 12
Electricity Accidents 13
Model System of Piping for a Laundry. W. A. Dow..... 13
Editorials:
Size of Reciprocating Engines..... 14
Electricity and the Stationary Engineer 15
The Service Power Plant at the St. Louis Exposition 16
Letters from Engineers:
Opening and Closing Valves..... 20
The Engineers We've Had. No. 6 22
A Bad Case..... 23
Questions and Answers..... 24
An Improved Pump Governor..... 26
Stillman - Carmichael Improved Damper Regulator 27
Improved Type of a Well-Known Pump for Operating Hydraulic Elevators 27
Approximate Weight of Water in Pipes 29
Book Review 29

DECEMBER, 1904.

A New England Power Plant. F. C. Perkins 3
Engineering Projects on the Canadian Side of the Niagara..... 5
The Principles of Mechanical Refrigeration 6
The Incandescent Lamp..... 8
Reciprocating Pump Water Valves.. 10
Where the Indicator Was a Good Investment. By W. F. Burdick..... 12
Methods of Starting Centrifugal Pumps 13
Editorials:
Speed of Boiler Feed Pumps..... 14
Fallacies and Facts of the Laws of Science 14
Smoke and its Prevention..... 15
Rolling Mill Engines. A. Gradenwitz 16
Electricity in Textile Mills..... 17
Coating for Iron Pipes..... 19
Letters from Engineers:
Opening and Closing Valves. A. T.'s Reply 20
One Kind of Valve Expert..... 23
A Home-Made Lubricator..... 23
Questions and Answers:
Improved Steam Engine Indicator Cylinder 27
The Buckeye Automatic Boiler Cleaner 28
The Mullin Automatic Controller for Feed Pumps 29
Book Review 29

JANUARY, 1905.

Hydraulic Plant at Shawinigan Falls 3
Armature Windings 6
Explosion of Threshing Engine Boiler 8
Air Receivers 8
Piping for Steam Heating Systems.. 9
Connecting Rod Stub Ends..... 12
Rules for Preparing Boilers for Inspection 13
Electrical Equivalents..... 13
Aluminium Wires 13
Editorials:
The Use of Tail Rods for Horizontal Engines 14
Alternating and Direct Current Motors 14
The Liquid Air Bubble..... 15
The Action of Steam in the Cylinder. By R. T. Strohm..... 16
Letters from Engineers:
Opening and Closing Valves..... 18
As Things are Often Done..... 19
Oil in Boilers Caused by Improperly Connected Drains..... 20
Efficiency Test of Boiler. Safety Valves 21
How Should Valves be Connected on Steam Boilers?..... 21
Rodney's Troubles. (Fifteenth Letter.) 22
Questions and Answers:
The Hancock Valves..... 27
Lubron Pump Valve..... 28
Book Review 28
